

Dear Parent or Guardian,

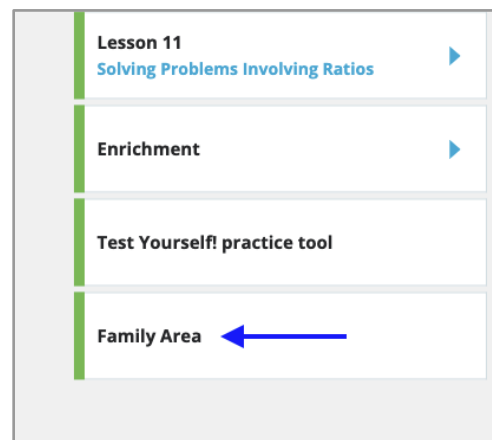

Welcome to Florida's B.E.S.T. Core Math Curriculum™ by Math Nation! We know that confidence in math class will help your student succeed in middle school, high school, and beyond. Math Nation is dedicated to providing the best resources and making them accessible to every student.

What is Florida's B.E.S.T. Math Core Curriculum by Math Nation?

- **MATH NATION** is an all-inclusive, comprehensive math resource created for Florida's B.E.S.T. Standards for Mathematics.
- **MATH NATION IS AVAILABLE ONLINE, AND CAN BE DOWNLOADED ON IPHONES, ANDROID PHONES, AND IPADS.** Your student can access and engage on their own time in a familiar, comfortable, pressure-free environment.
- Fun, highly-interactive instructional videos help your student review the material they learn in class. And best yet, there are several Study Experts to choose from for each video, including Spanish and Haitian Creole speaking Study Experts.
- Digital workbook lessons align with every video and can be translated into multiple languages. Your student can also use the printed, color workbook to follow along with the videos.
- Accessibility features empower students and ensure that all students have the resources they need to be successful.
- Auto-graded practice is available for your student via the Stepping Stones and Check Your Understanding tools for each lesson. They can also engage in the Test Yourself! auto-graded practice tool at the end of each unit.

What can I do to help my student succeed?

- Go to best.MathNation.com and have your student show you how they sign in.
- Ask your student to watch **MATH NATION** videos to help with homework, to review for a test, or to get caught up if they are absent from class.
- Your student can also use Stepping Stones and Check Your Understanding at the end of a lesson and the Test Yourself! Practice Tool at the end of each unit to identify which parts of the material they understood and which videos and topics they need to review.
- Visit the Family Area to watch the Welcome Video, which should help you navigate the resource-rich environment. You can access the Family Area in the lower left corner of the digital workbook or from the Menu in the top right corner.
- Watch the Family Support Videos which are provided for each and every lesson. These will tell you exactly what your student is learning in each unit and how their learning connects to how you may have learned the very same concepts.
- Take advantage of after school and weekend tutoring by having your Algebra 1, Geometry, or Algebra 2 student post their questions on the Student Wall.
- We know that education is not one-size-fits-all, so if you worry that your student needs some help getting caught up or is not being challenged, we have solutions! While our On-Ramp Personalized Learning Tool is available at 5 different course levels to help students fill any gaps they might have, we also provide enrichment opportunities at the end of each unit.
- You can track your student's performance at any time by clicking the Student Progress tab at the top of the page!

Math Nation...and Beyond!

Finally, our commitment to students includes PSAT, SAT, and ACT prep. We know that the measure of student success extends beyond course completion and must account for their next steps.

Sincerely,

The **MATH NATION** Team
